

Contents

PART I Introduction to Physical Agents 1

1 The Physiology of Physical Agents, 1

- How to Use This Book, 1
- What Are Physical Agents? 2
- Categories of Physical Agents, 2
- Effects of Physical Agents, 3
- General Contraindications and Precautions for Physical Agent Use, 9
- Evaluation and Planning for the Use of Physical Agents, 10
- Documentation, 12
- Chapter Review, 12
- Glossary, 12
- References, 13

2 Physical Agents in Clinical Practice, 15

- Michelle H. Cameron and Ashley L. Shea*
- History of Physical Agents in Medicine and Rehabilitation, 15
- Approaches to Rehabilitation, 16
- The Role of Physical Agents in Rehabilitation, 17
- Practitioners Using Physical Agents, 18
- Evidence-Based Practice, 18
- Using Physical Agents Within Different Health Care Delivery Systems, 21
- Chapter Review, 22
- Glossary, 22
- References, 23

PART II Pathology and Patient Problems 25

3 Inflammation and Tissue Repair, 25

- Xiao-Yue Han, Vernon Lee Cowell Jr., and Julie A. Pryde*
- Phases of Inflammation and Healing, 25
- Chronic Inflammation, 38
- Factors Affecting the Healing Process, 38
- Healing of Specific Musculoskeletal Tissues, 41
- Clinical Case Studies, 43
- Chapter Review, 44
- Glossary, 45
- References, 46

4 Pain and Pain Management, 49

- William Rubine, Michelle H. Cameron, and Eve L. Klein*
- Pain, Nociception, and the Nociceptive System, 50
- Types of Pain, 54
- Measuring Pain, 58
- Pain Management, 61
- Clinical Case Studies, 66
- Chapter Review, 68

- Glossary, 68
- References, 69

5 Tone Abnormalities, 73

- Diane D. Allen and Gail L. Widener*
- Muscle Tone, 73
- Tone Abnormalities, 74
- Measuring Muscle Tone, 75
- Anatomical Bases of Muscle Tone and Activation, 79
- Abnormal Muscle Tone and Its Consequences, 91
- Clinical Case Studies, 98
- Chapter Review, 101
- Glossary, 101
- References, 102

6 Motion Restrictions, 105

- Linda G. Monroe*
- Types of Motion, 106
- Patterns of Motion Restriction, 108
- Tissues That Can Restrict Motion, 108
- Pathologies That Can Cause Motion Restriction, 109
- Examination and Evaluation of Motion Restrictions, 111
- Contraindications and Precautions to Range-of-Motion Techniques, 114
- Treatment Approaches for Motion Restrictions, 114
- Role of Physical Agents in the Treatment of Motion Restrictions, 116
- Clinical Case Studies, 117
- Chapter Review, 120
- Glossary, 120
- References, 120

PART III Thermal Agents 123

7 Introduction to Thermal Agents, 123

- Specific Heat, 123
- Modes of Heat Transfer, 123
- Chapter Review, 126
- Glossary, 126

8 Superficial Cold and Heat, 127

- Cryotherapy, 127**
- Effects of Cold, 127
- Clinical Indications for Cryotherapy, 130
- Contraindications and Precautions for Cryotherapy, 133
- Adverse Effects of Cryotherapy, 134
- Application Techniques, 135
- Documentation, 141
- Clinical Case Studies, 142

- Thermotherapy, 146
 - Effects of Heat, 146
 - Clinical Indications for Superficial Heat, 148
 - Contraindications and Precautions for Thermotherapy, 149
 - Adverse Effects of Thermotherapy, 152
 - Application Techniques, 153
 - Documentation, 162
 - Clinical Case Studies, 162
 - Choosing Between Cryotherapy and Thermotherapy, 168
 - Chapter Review, 168
 - Glossary, 168
 - References, 169
 - 9 Ultrasound, 172**
 - Introduction, 172
 - Effects of Ultrasound, 174
 - Clinical Indications for Ultrasound, 176
 - Contraindications and Precautions for Ultrasound, 181
 - Adverse Effects of Ultrasound, 183
 - Application Technique, 184
 - Documentation, 186
 - Clinical Case Studies, 187
 - Chapter Review, 192
 - Glossary, 192
 - References, 196
 - 10 Diathermy, 200**
 - Physical Properties of Diathermy, 201
 - Types of Diathermy Applicators, 202
 - Effects of Diathermy, 203
 - Clinical Indications for Diathermy, 205
 - Contraindications and Precautions for Diathermy, 207
 - Adverse Effects of Diathermy, 209
 - Application Technique, 209
 - Documentation, 211
 - Clinical Case Studies, 212
 - Chapter Review, 216
 - Glossary, 216
 - References, 216
- PART IV Electrical Currents 219**
- 11 Introduction to Electrotherapy, 219**
 - Michelle H. Cameron, Sara Shapiro, and Michelle Ocelnik*
 - Electrical Current Devices, Waveforms, and Parameters, 220
 - Effects of Electrical Currents, 225
 - Contraindications and Precautions for Electrical Currents, 228
 - Adverse Effects of Electrical Currents, 231
 - Application Technique, 231
 - Documentation, 234
 - Chapter Review, 234
 - Glossary, 234
 - References, 236
 - 12 Electrical Currents for Muscle Contraction, 238**
 - Michelle H. Cameron, Sara Shapiro, and Michelle Ocelnik*
 - Effects of Electrically Stimulated Muscle Contractions, 238
 - Clinical Applications of Electrically Stimulated Muscle Contractions, 239
 - Contraindications and Precautions for Electrically Stimulated Muscle Contractions, 244
 - Application Techniques, 245
 - Documentation, 249
 - Clinical Case Studies, 250
 - Chapter Review, 253
 - Glossary, 253
 - References, 254
 - 13 Electrical Currents for Pain Control, 258**
 - Michelle H. Cameron, Sara Shapiro, and Michelle Ocelnik*
 - Mechanisms Underlying Electrical Current Use for Pain Control, 258
 - Clinical Applications of Electrical Currents for Pain Control, 260
 - Contraindications and Precautions for Electrical Currents for Pain Control, 261
 - Adverse Effects of Transcutaneous Electrical Nerve Stimulation, 262
 - Application Technique, 262
 - Documentation, 264
 - Clinical Case Studies, 265
 - Chapter Review, 268
 - Glossary, 268
 - References, 269
 - 14 Electrical Currents for Soft Tissue Healing, 271**
 - Michelle H. Cameron, Sara Shapiro, and Michelle Ocelnik*
 - Mechanisms Underlying Electrical Currents for Tissue Healing, 271
 - Clinical Applications of Electrical Stimulation for Soft Tissue Healing, 272
 - Contraindications and Precautions for Electrical Currents for Tissue Healing, 275
 - Adverse Effects of Electrical Currents for Tissue Healing, 276
 - Application Techniques, 276
 - Documentation, 281
 - Clinical Case Studies, 281
 - Chapter Review, 286
 - Glossary, 286
 - References, 286
 - 15 Electromyographic (EMG) Biofeedback, 289**
 - Jason E. Bennett*
 - Introduction, 289
 - Physiological Effects of EMG Biofeedback, 292

Clinical Indications for EMG Biofeedback, 294
 Contraindications and Precautions for EMG Biofeedback, 296
 Adverse Effects of EMG Biofeedback, 297
 Application Technique, 297
 Documentation, 298
 Clinical Case Studies, 299
 Chapter Review, 303
 Glossary, 303
 References, 303

PART V Electromagnetic Agents 305

16 Lasers and Light, 305

Introduction, 305
 Physiological Effects of Lasers and Light, 312
 Clinical Indications for Lasers and Light, 313
 Contraindications and Precautions for Lasers and Light, 315
 Adverse Effects of Lasers and Light, 317
 Application Technique, 317
 Documentation, 320
 Clinical Case Studies, 320
 Chapter Review, 323
 Glossary, 323
 References, 324

17 Ultraviolet Therapy, 327

Physical Properties of Ultraviolet Radiation, 327
 Effects of Ultraviolet Radiation, 327
 Clinical Indications for Ultraviolet Radiation, 330
 Contraindications and Precautions for Ultraviolet Radiation, 331
 Adverse Effects of Ultraviolet Radiation, 332
 Application Techniques, 333
 Documentation, 335
 Ultraviolet Lamps, 336
 Clinical Case Study, 337
 Chapter Review, 338
 Glossary, 338
 References, 339

PART VI Mechanical Agents 341

18 Hydrotherapy, 341

Physical Properties of Water, 342
 Physiological Effects of Hydrotherapy, 344

Clinical Indications for Hydrotherapy, 348
 Contraindications and Precautions for Hydrotherapy and Negative Pressure Wound Therapy, 355
 Adverse Effects of Hydrotherapy, 359
 Adverse Effects of Negative Pressure Wound Therapy, 359
 Application Techniques, 359
 Safety Issues Regarding Hydrotherapy, 365
 Documentation, 366
 Clinical Case Studies, 366
 Chapter Review, 370
 Glossary, 370
 References, 371

19 Traction, 374

Michelle H. Cameron and Tony Rocklin
 Effects of Traction, 375
 Clinical Indications for Traction, 377
 Contraindications and Precautions for Traction, 378
 Adverse Effects of Spinal Traction, 382
 Application Techniques, 383
 Documentation, 397
 Clinical Case Studies, 398
 Chapter Review, 404
 Glossary, 404
 References, 404

20 Compression, 407

Effects of External Compression, 407
 Clinical Indications for External Compression, 408
 Contraindications and Precautions for External Compression, 414
 Adverse Effects of External Compression, 417
 Application Techniques, 417
 Documentation, 425
 Clinical Case Studies, 426
 Chapter Review, 430
 Glossary, 430
 References, 431

Appendix, 433
