Features and Benefits	xvii
Acknowledgments	xix
Reviewers	xxi

SECTION I Fundamentals 1

Chapter 1 The Physical Therapist Assistant's Role in Orthopaedics. 3

Overview	3
Direct Access	4
Evidence-Based Practice	4
The Role of the Physical Therapist Assistant	4
Appearance	7
The Rehabilitation Team	7
Models of Disablement	9
Personality	11
Values and Beliefs	11
Cultural Influences	11
Motivation and Compliance	12
Motivation	12
Compliance	12
Patient Education	12
Privacy and Patient Confidentiality	15
Reimbursement	15
Productivity	16
Summary	16

Chapter 2 Anatomy and Biomechanics of the Musculoskeletal System 19

Overview	19
Musculoskeletal Tissue	19
Connective Tissue	20

Fascia	20
Tendons	21
Ligaments	23
Bone	23
Articular Cartilage	25
Fibrocartilage	25
Bursae	31
Skeletal Muscle Tissue	31
Machinery of Movement	31
Muscle Fiber Types	33
Muscle Function	35
Vascular Tissue	36
Kinesiology	37
Anatomic Position	37
Directional Terms	37
Planes of the Body	39
Axes of the Body	39
Force	40
Load Deformation Curve	42
Levers	43
Mechanical Advantage	44
Equilibrium	44
Newton's Laws of Motion	45
Active Length–Tension Relationship	45
Passive Length–Tension Relationship	46
Force–Velocity Relationship	46
Joint Kinematics	47
Close-Packed and Open-Packed Positions of the Joint	48
Range of Motion, Flexibility, and Joint Mobility	49
Summary	50

Chapter 3 The Nervous System 55

Overview	55
Central Nervous System	55
Peripheral Nervous System	56
The Cranial Nerves	60
The Spinal Nerves	60
The Brachial Plexus	62
Autonomic Nerves	68
Transmission of Pain	69

Clinical Implications of the Neuromuscular System	71
Lesions of the Nervous System	73
Neurovascular Healing	79
Nerve Injury Classification	79
Medical Interventions for Nerve Injury	80
Neuromuscular Testing in Orthopaedics	81
Reflexes	81
Sensory Testing	81
Neuromeningeal Mobility Testing	83
Balance Testing	83
Coordination Testing	84
Upper and Lower Quarter Scanning Examination	84
Summary	88

Chapter 4 Tissue Injury and Repair..... 93

Overview	93
Tissue Healing	93
Inflammatory (Acute) Stage	94
Proliferative (Subacute) Stage	96
Remodeling Stage	97
Tissue Specific Responses to Injury	97
Muscle and Tendon Injuries	97
Ligament Injury	101
Muscle, Tendon, and Ligament Healing—Implications for the PTA	102
Inflammatory (Acute) Stage	103
Proliferative (Subacute) Stage	104
Remodeling Stage	105
Articular Cartilage Injury and Disease	106
Fibrocartilage Healing	107
Bone	107
Fractures	107
Bone Healing	110
Implications for the PTA	111
Detrimental Effects of Immobilization	112
Surgical Interventions	113
Surgical Repair of Tendons	113
Surgical Repair of Ligaments	113
Surgical Repair of Cartilage, Bones, and Joints	114
Summary	116

Chapter 5 General Conditions 121

Overview	121
----------------	-----

Fibromyalgia	122
Implications for the PTA	122
Myofascial Pain Syndrome	122
Implications for the PTA	122
Osteoarthritis	123
Rheumatoid Arthritis	127
Ulnar Drift	127
Radial Deviation of the CMC Block	127
Implications for the PTA	127
Osteoporosis	128
Implications for the PTA	129
Recognizing a Medical Emergency	129
Medical Emergency Diagnoses	130
Laboratory Values	136
Musculoskeletal Pharmacology	136
Antibacterial Drugs	137
Opioid Analgesics	140
Nonopioid Analgesics	140
Corticosteroids	140
Muscle Relaxants	141

Chapter 6 Assessment of the Musculoskeletal System..... 149

Overview	149
The Elements of Patient Management	150
Examination	150
Patient History	150
Systems Review	150
General Medical Assessment	150
Tests and Measures	158
Evaluation	169
Intervention	170
Outcomes	170
Plan of Care	173
Patient Coordination and Communication	173
Documentation	175
Abbreviations	176
Ongoing Assessment, Progression, and Compliance	176
Imaging Studies	176
Conventional (Plain Film) Radiography	176
Stress Radiograph	178
Arthrography	178
Myelography	178
Diskography	178
Angiography	178

Video Fluoroscopy	179
Computed Tomography	179
CT Myelogram	180
Magnetic Resonance Imaging	180
Magnetic Resonance Spectroscopy	180
Diagnostic Ultrasound (Ultrasonography)	181
Radionuclide Scanning	181

Chapter 7 Gait and Posture 187

Overview	187
Gait	187
Terminology	188
Gait Cycle	188
Characteristics of Normal Gait	192
The Kinematics of Gait	194
Influences on Normal Gait	198
Abnormal Gait Syndromes	199
Gait Training with Assistive Devices	201
Running	205
Posture	205
Postural Examination	208
Common Faulty Postures	209
Intervention	214
Summary	214

Chapter 8 Decision-Making for the Physical Therapist Assistant 219

Overview	219
Clinical Decision-Making	220
Correct Therapeutic Exercise Progression	224
Exercise Precautions	225
Summary	225

Chapter 9 Manual Modalities 229

Overview	229
Correct Application of Manual Techniques	230
Indications for Manual Therapy	231
Contraindications to Manual Therapy	231
Massage	231
Specific Massage Techniques	232
Manual Lymphatic Drainage	233
Joint Mobilizations	233
Joint Mobilization Approaches	236
Australian Techniques	237
Clinical Application	237

Soft Tissue Mobilization Techniques	238
Transverse Friction Massage	238
Augmented Soft Tissue Mobilization	239
Myofascial Release	239
Muscle Energy	241
Proprioceptive Neuromuscular Facilitation	241
Muscle Energy	244
Myofascial Trigger Point Therapy	244
Stretch and Spray or Stretch and Ice	245
Neurodynamic Mobilizations	245
Summary	247

Chapter 10 Physical Agents and Mechanical Modalities 251

Overview	251
Physical Agents	253
Cryotherapy	254
Thermotherapy	256
Hydrotherapy	263
Electrotherapeutic Modalities	268
Physiological Effects	269
Electrodes and Their Placement	271
Electrical Equipment Care and Maintenance	272
Transdermal Iontophoresis	272
Transcutaneous Electrical Nerve Stimulation	274
Russian Current or Medium-Frequency Alternating Current	274
Interferential Current	275
Biofeedback	275
Mechanical Modalities	276
Mechanical Spinal Traction	276
Summary	278

SECTION II Therapeutic Activities 283

Chapter 11 Therapeutic Exercise 285

Overview	285
Kinematic Chains	285
Closed Kinematic Chain	285
Open Kinematic Chain	286
Exercise Physiology	287
Measures of Energy Expenditure	288
Basal Metabolic Rate (BMR)	289

Body Mass Index	289
Bioelectrical Impedance Analysis	290
Motor Learning	290
Open Versus Closed Skills	290
Gentile's Taxonomy of Motor Tasks	290
Stages of Motor Learning	291
Practice and Feedback	291
Patient Safety	293
Summary	293

Chapter 12 Improving Mobility..... 295

Overview	295
Improving Range of Motion	295
Passive Range of Motion	296
Active-Assisted Range of Motion	300
Active Range of Motion	300
Improving Flexibility	300
Stretching	302
Self-Stretching	306
Improving Joint Mobility	306
Summary	307

Chapter 13 Improving Muscle Performance 309

Overview	309
Improving Strength	311
Methods of	
Strengthening Muscles	312
Neuromuscular Electrical Stimulation	312
Isometric Exercises	312
Concentric/Isotonic Exercises	313
Eccentric Exercises	313
Isokinetic Exercise	314
Proprioceptive Neuromuscular	
Facilitation	314
Stabilization Exercises	315
Periodization	316
Types of Resistance	317
Considerations for Strength Training	318
Strengthening Exercise Programs	319
Maintaining Strength	321
Delayed Onset Muscle Soreness	321
Improving Muscular Endurance	322
Improving Muscle Power	323
Plyometrics	323
Summary	325

Chapter 14 Improving Balance 331

Overview	331
Impaired Balance	332
Somatosensory System	332
Visual and Vestibular Input	332
Sensory Motor Integration	333
Motor Output Generation	333
Improving Balance	334
Agility	338
Summary	339

Chapter 15 Improving Cardiovascular Conditioning 341

Overview	341
Physical Fitness	341
Physical Activity	342
Cardiorespiratory Endurance	342
Recovery	343
Precautions with Aerobic Conditioning	343
Techniques for Improving, Maintaining,	
and Monitoring Cardiorespiratory Endurance ...	344
Aerobic Conditioning Programs	345
Summary	346

SECTION III The Joints 349

Chapter 16 The Vertebral Column..... 351

Overview	351
Design	351
Structure	352
Motion Segments	353
Intervertebral Foramina	355
Neutral Zone	355
Spinal Motion	355
Coupled Motions	356
Fryette's Laws of Physiological	
Spinal Motion	356
Fryette's First Law	356
Fryette's Second Law	356
Fryette's Third Law	356
General Guidelines for Interventions for	
Spinal Dysfunction	357
Acute Phase	357
Subacute and Chronic (Functional) Phases	357
Summary	358

Chapter 17 Cervical Spine and Temporomandibular Joint 361

Overview	361
Anatomy and Kinesiology	361
Cervical Spine	362
Temporomandibular Joint	363
Examination	367
Range of Motion	367
Evidence-Based Testing	368
Intervention Strategies for the Cervical Spine	371
Acute Phase	371
Subacute Through Chronic Phases	375
Functional Retraining	375
Intervention Strategies for the Temporomandibular Joint	377
Common Conditions	378
Cervical Strains and Sprains	378
Whiplash-Associated Disorders	379
Intervention for Cervical Sprains and Strains	379
Impaired Posture	379
Intervention	380
Cervical Spondylosis	380
Zygapophyseal Joint Dysfunction	381
Thoracic Outlet Syndrome	381
Cervical Disk Lesions	382
Acute Torticollis (Acute Wry Neck)	383
Temporomandibular Joint Dysfunction	383
Therapeutic Techniques	385
Techniques to Increase Soft Tissue Extensibility	386
General Soft Tissue Techniques	387
Self-Stretches	388
Summary	390

Chapter 18 Thoracic Spine and Rib Cage 395

Overview	395
Anatomy and Kinesiology	396
Muscles	396
Thoracic Motions	396
Respiration	398
Examination	398
Range of Motion	398
Intervention Strategies	400
Acute/Subacute Phase	400
Functional/Chronic Phase	402
Postural Dysfunction	404
Abnormal Pelvic Tilting	404

Structural Dysfunctions	404
Kyphosis	404
Sternal Deformities	405
Intervention	406
Muscle Strains	407
Intercostal Muscles	407
Intervention	407
Rotoscoliosis	407
Intervention	408
Compression Fractures of the Spine	408
Intervention	408
Techniques to Increase Soft Tissue Extensibility	408
Manual Stretch into Extension	408
Bucket Handle Stretch	409
Summary	409

Chapter 19 Lumbar Spine and Sacroiliac Joint 413

Overview	413
Anatomy of the Lumbar Spine	414
Ligaments	415
Vertebrae	415
Intervertebral Disk	415
Kinesiology of the Lumbar Spine	415
Flexion	416
Extension	416
Side Bending	416
Axial Rotation	417
Axial Loading (Compression)	417
Anatomy of the Sacroiliac Joint	417
Posterior Muscle System	418
Anterior Muscle System	418
Kinesiology of the Sacroiliac Joint	419
Sacral Motion	419
Innominate Motion	420
Pelvic Tilt	421
Pelvic Stabilization	421
Examination of the Lumbopelvic Complex	423
Goniometry	423
General Intervention Strategies	430
Acute Phase	430
Functional/Chronic Phase	434
Common Conditions	441
Low Back Pain	441
Clinical Spinal Instability	441
Disk Herniation	442
Degenerative Spinal Stenosis	446
Zygapophyseal Joint Dysfunction	448

Spondylolysis	448
Spondylolisthesis	448
Rectus Abdominis Strain	450
Summary	450

Chapter 20 Shoulder Complex..... 457

Overview	457
Anatomy and Kinesiology.....	457
Sternoclavicular Joint	457
Scapulothoracic Articulation	460
Acromioclavicular Joint	461
Glenohumeral Joint	461
Coracoacromial Arch.....	466
Suprahumeral/Subacromial Space	466
The Scapulohumeral Rhythm	466
Muscle Function During Shoulder Motions.....	468
Examination	470
Range of Motion	470
General Intervention Strategies	470
Acute Phase	479
Chronic/Functional Phase	481
Common Conditions	485
Scapular Dyskinesia	485
Rotator Cuff Tendinopathy	485
Rotator Cuff Repair.....	487
Glenohumeral Instability	488
Frozen Shoulder/Adhesive Capsulitis	493
Sternoclavicular Joint Sprain	494
Acromioclavicular Joint Sprain	496
Clavicle Fractures	499
Proximal Humeral Fractures	499
Total Shoulder Arthroplasty	500
Therapeutic Techniques	504
Scapular Assist	504
Rhythmic Stabilization	504
Restricted Scapulothoracic Motion	504
Transverse Frictional Massage (TFM).....	506
Joint Mobilizations.....	506
Summary.....	508

Chapter 21 Elbow and Forearm Complex... 513

Overview	513
Anatomy and Kinesiology.....	513
Ligaments	515
Muscles.....	516
Nerve Supply	521
The Cubital Tunnel	521
The Cubital Fossa	521

Examination of the Elbow Complex.....	522
Goniometry.....	522
Intervention Strategies	522
Acute Phase	524
Chronic/Functional Phase.....	524
Common Conditions	528
Tendon Ruptures.....	528
Overuse Injuries.....	528
Pathologic Bone Formation	532
Olecranon Bursitis.....	533
Supracondylar Fractures.....	533
Intercondylar Fractures.....	533
Radial Head Fractures and Dislocations.....	534
Olecranon Fracture.....	535
Elbow Dislocation.....	536
Therapeutic Techniques	537
Techniques to Increase Soft Tissue Extensibility....	537
Transverse Frictional Massage	539
Selective Joint Mobilizations	540
Summary.....	540

Chapter 22 Wrist and Hand 543

Overview	543
Anatomy	543
Distal Radioulnar Joint	543
Radiocarpal (Wrist) Joint	543
Midcarpal Joint	545
Antebrachial Fascia.....	545
Extensor Retinaculum	545
Flexor Retinaculum	546
Carpal Tunnel	547
Tunnel of Guyon	547
Metacarpophalangeal Joints of the Second to Fifth Digits	547
Carpometacarpal Joints of the Second to Fifth Digits	547
First Carpometacarpal Joint	547
Metacarpophalangeal Joint of the Thumb.....	547
Interphalangeal Joints.....	547
Palmar Aponeurosis.....	548
Anatomic Snuff Box.....	548
Muscles of the Wrist and Forearm	548
Kinesiology.....	550
Pronation and Supination	550
Movement of the Hand on the Forearm	550
Functional Use of the Hand	551
Flexion and Extension Movements of the Wrist....	551
Frontal Lateral Movements of the Wrist.....	552
Thumb Movements.....	553

Examination	553
Range of Motion	553
General Intervention Strategies	557
Acute Phase	557
Functional/Chronic Phase	560
Common Conditions	564
Peripheral Nerve Entrapment	564
Tendinopathy	567
Dupuytren Contracture (Palmar Fasciitis)	570
Tendon Ruptures	571
Wrist Sprains	572
Distal Radius Fractures	573
Fractured Scaphoid	575
Ulnar Collateral Ligament Sprain of the Thumb	576
Metacarpal Fractures	577
Finger Fractures	577
Complex Regional Pain Syndrome	577
Therapeutic Techniques	579
To Improve Hand Dexterity	579
To Improve Hand Strength	579
Joint Mobilizations	579
Summary	581

Chapter 23 Hip Joint Complex..... 585

Overview	585
Anatomy	585
Bones	585
Muscles	586
Ligaments	592
Kinesiology	593
Lumbopelvic Rhythm	594
Collum/Inclination Angle	594
Anteversion/Retroversion	595
Examination	595
Range of Motion	595
General Intervention Strategies	600
Acute Phase	600
Functional Phase	601
Common Conditions	607
Hip Flexion Contracture	607
Osteoarthritis	608
Muscle Strains	609
Iliotibial Band Friction Syndrome	612
Gluteal Tendinopathy	614
Bursitis	615
Fractures of the Pelvis	616

Fractures of the Acetabulum	617
Hip Fractures	617
Legg-Calvé-Perthes Disease	619
Slipped Capital Femoral Epiphysis	619
Hip Preservation Surgery	619
Total Hip Arthroplasty	620
Intervention	623
Hemiarthroplasty	624
Therapeutic Techniques	624
Self-Stretching	624
Selective Joint Mobilizations	625
Summary	627

Chapter 24 Knee Joint Complex 631

Overview	631
Anatomy	631
Knee Menisci	632
Osteokinematics of the Tibiofemoral Joint	634
Arthrokinematics of the Tibiofemoral Joint	634
The Patellofemoral Joint	635
Muscles of the Knee Joint Complex	635
Patellar Tracking	638
Examination	639
Range of Motion	639
General Intervention Strategies	642
Acute Phase	642
Functional Phase	643
Common Conditions	648
Anterior Cruciate Ligament Tear	648
Posterior Cruciate Ligament Tear	651
Medial Collateral Ligament Injuries	652
Meniscus Injuries	654
Articular Cartilage Defects	655
Tibiofemoral Osteoarthritis	656
Patellofemoral Pain Syndrome	659
Tendinopathy	665
Infrapatellar Fat Pad Syndrome	666
Patellar Fractures	667
Supracondylar Femur Fractures	667
Tibial Plateau Fractures	667
Osgood-Schlatter Disease	668
Therapeutic Techniques	668
Self-Stretching	668
Techniques to Increase Soft Tissue Extensibility	668
Selective Joint Mobilizations	669
Summary	670

Chapter 25 Ankle and Foot 675

Overview.....	675
Anatomy and Kinesiology.....	675
Terminology.....	676
Joints of the Ankle and Foot.....	679
Examination.....	686
Goniometry.....	686
General Intervention Strategies.....	689
Acute Phase.....	689
Functional/Chronic Phase.....	692
Common Conditions.....	696
Deformities of the Arch.....	696
Sprains.....	698
Hallux Valgus.....	701
Turf Toe.....	703
Lesser Toe Deformities.....	703
Tendon Injuries.....	705
Plantar Heel Pain.....	708
Metatarsalgia.....	710
Tarsal Tunnel Syndrome.....	710
Interdigital Neuroma.....	711
Acute Compartment Syndrome.....	711
Medial Tibial Stress Syndrome.....	712
Stress Fractures.....	712
Therapeutic Techniques.....	715
Techniques to Increase Soft Tissue Extensibility.....	715
Techniques to Increase Strength.....	716
Selective Joint Mobilizations.....	716
Summary.....	718

SECTION IV **Special Considerations** **725**

Chapter 26 The Pediatric Orthopaedic Population..... 727

Overview.....	727
Guidelines for Exercise Training in the Young.....	734
Pediatric Orthopaedic Conditions.....	734
Acquired Conditions.....	734
Congenital.....	746
Summary.....	748

Chapter 27 The Geriatric Orthopaedic Population..... 751

Overview.....	751
The Aging Process.....	751
Theories of Aging.....	753
Pathologic Conditions Associated with the Elderly.....	754
Musculoskeletal Disorders and Diseases.....	754
Osteoporosis.....	755
Fractures.....	755
Neurological Disorders and Diseases.....	755
Cardiovascular Disorders and Diseases.....	756
Multisystem Dysfunction.....	758
General Guidelines for Strength Training in the Elderly.....	763
Ethical and Legal Issues.....	763
The Living Will (Advanced Care and Medical Directive).....	763
Refusal of Treatment.....	764
Do Not Resuscitate (DNR) Orders.....	764
Healthcare Proxy.....	764
Informed Consent.....	764
Summary.....	764

Appendix A American Physical Therapy Association Guide for Conduct of the Physical Therapist Assistant..... 767**Appendix B American Physical Therapy Association's Documentation Guidelines..... 771****Appendix C Commonly Used Abbreviations in Orthopaedics..... 773****Appendix D Common Laboratory Values..... 775****Appendix E Proprioceptive Neuromuscular Facilitation (PNF) Terms and Techniques..... 781****Appendix F Close-Packed and Open-Packed Positions of the Joints..... 785****Answer Key..... 789****Index..... 795**
