

# Contents

## Part I: Cardiovascular and Pulmonary Function in Health and Disease

---

- 1 Epidemiology as a Basis for Informing Contemporary Physical Therapist Practice, 2**  
*Elizabeth Dean and Claire Peel*
- 2 Cardiovascular and Pulmonary Function in Health, 35**  
*Claudia Krebs and Elizabeth Dean*
- 3 Cardiovascular and Pulmonary Function in Disease, 76**  
*Claudia Krebs and Elizabeth Dean*
- 4 Psychosocial Aspects of Health Status: Theoretical Bases, 104**  
*Anne Söderlund and Maria Bäck*

## Part II: Cardiovascular and Pulmonary Physical Therapy: Cardiopulmonary Assessment

---

- 5 Measurement, Documentation, and Clinical Decision Making, 114**  
*John D. Lowman*
- 6 History, 125**  
*Rachel Tappan and Elizabeth Dean*
- 7 Pulmonary Function Tests, 135**  
*Mark W. Mangus Sr. and Donna Frownfelter*
- 8 Arterial Blood Gases, 143**  
*Mark W. Mangus Sr. and Donna Frownfelter*
- 9 Imaging of the Chest, 151**  
*Alice YM Jones, Myriam Riboh and Patrick Knott*
- 10 Electrocardiogram Identification and Interpretation, 159**  
*Christian Evans and Gary Brooks*

- 11 Multisystem Assessment and Laboratory Investigations, 176**  
*Pamela Bartlo and Elizabeth Dean*
- 12 Cardiovascular and Pulmonary Invasive and Noninvasive Tests, 181**  
*Gail M. Huber*
- 13 Clinical Assessment and Evaluation of the Cardiovascular and Pulmonary Systems, 197**  
*Noah Greenspan, Greg Sweeney, and Donna Frownfelter*
- 14 Clinical Assessment and Evaluation of Psychosocial Status, 215**  
*Maria Bäck and Anne Söderlund*

## Part III: Cardiovascular and Pulmonary Physical Therapy: Interventions

---

- 15 Maximizing Outcomes: Relating Interventions to an Individual's Needs, 224**  
*Pamela Bartlo, Donna Frownfelter, and Elizabeth Dean*
- 16 Psychosocial Interventions to Augment Outcomes, 239**  
*Maria Bäck and Anne Söderlund*
- 17 Mobilization and Exercise: Physiological Basis for Assessment, Evaluation, and Training, 247**  
*Scotty Butcher and Elizabeth Dean*
- 18 Mobilization and Exercise: Testing and Training, 277**  
*Scotty Butcher and Elizabeth Dean*
- 19 Therapeutic Body Positioning, 300**  
*Shane Patman and Elizabeth Dean*
- 20 Airway Clearance and Coughing Techniques, 318**  
*Anne Mejia-Downs, Joanne S. Hartshorn and Donna Frownfelter*

**21 Facilitating Ventilation Patterns and Breathing Strategies, 355**

*Joanne S. Hartshorn and Donna Frownfelter*

**22 Exercise Testing and Training: Cardiovascular and Pulmonary Dysfunction, 380**

*Noah Greenspan, Greg Sweeney, and Elizabeth Dean*

**23 Respiratory Muscle Training, 406**

*Rik Gosselink, Daniel Langer, and Simone Dal Corso*

**24 Integrative Therapies as Cardiovascular and Pulmonary Physical Therapy Interventions, 424**

*Brady Anderson, Meryl I. Cohen, Carol M. Davis, Nicole DeLuca, Sabine Gempel, and Yessenia Orozco*

**25 Patient Education, 460**

*Meredith Baker-Rush and Kelly Hawthorne*

**Part IV: Cardiovascular and Pulmonary Physical Therapy Acute and Chronic Conditions**

**26 Individuals With Acute Medical and Surgical Conditions, 476**

*Elizabeth Dean*

**27 Individuals With Chronic Primary Cardiovascular and Pulmonary Dysfunction, 505**

*Pamela Bartlo, Dawn Stackowicz, Donna Frownfelter, and Elizabeth Dean*

**28 Individuals With Chronic Secondary Cardiovascular and Pulmonary Dysfunction, 528**

*Pamela Bartlo, Dawn Stackowicz, Donna Frownfelter, and Elizabeth Dean*

**Part V: Cardiovascular and Pulmonary Physical Therapy: Intensive Care**

**29 Monitoring Systems, Catheters, and Devices in the Intensive Care Unit, 546**

*Dawn Stackowicz, Donna Frownfelter, and Elizabeth Dean*

**30 Comprehensive Management of Individuals in the Intensive Care Unit, 560**

*Amanda Piper and Elizabeth Dean*

**31 Intensive Care Management of Medical and Surgical Conditions, 574**

*Amanda Jane Piper, Shane Patman, Rik Gosselink and Elizabeth Dean*

**Part VI: Cardiovascular and Pulmonary Physical Therapy: Special Cases**

**32 Infants and Children With Cardiovascular and Pulmonary Dysfunction, 612**

*Mary Rahlin*

**33 The Older Adult, 636**

*William E. Healey*

**34 Multisystem Consequences of Impaired Breathing Mechanics and/or Postural Control, 643**

*Lindsay Jorns*

**35 The Transplant Patient, 664**

*Laura Friedman*

**36 The Patient in the Community, 679**

*Jennifer M. Ryan and Donna Frownfelter*

**Part VII: Related Aspects of Cardiovascular and Pulmonary Physical Therapy**

**37 Body Mechanics: Positioning and Moving Patients, 696**

*Joanne S. Hartshorn and Donna Frownfelter*

**38 Review of Respiratory Care Practices, 706**

*Mark W. Mangus Sr.*

**39 Care of the Patient With an Artificial Airway, 726**

*Meredith Baker-Rush and Donna Frownfelter*

**Appendix A Elements of International Standards for a Cardiac Rehabilitation Program, 739**

**Appendix B Elements of International Standards for a Pulmonary Rehabilitation Program, 743**

**Appendix C Exercise Testing and Prescription Considerations for People With Primary Cardiovascular, Pulmonary, and Endocrine Conditions, 747**

**Appendix D Exercise Testing and Prescription Considerations for People With Nonprimary Heart, Lung, and Endocrine Conditions, 763**

**Appendix E Common Complementary Therapies, 780**

Glossary, 784

Index, 791

# Video Contents

## **1 Epidemiology as a Basis for Informing Contemporary Physical Therapist Practice**

---

- 1-1 Introduction
- 1-2 Global Health Summits
- 1-3 PT's Role in NCD Prevention and Management
- 1-4 Hippocrates' Philosophy
- 1-5 Summit Findings
- 1-6 Health Literacy
- 1-7 Self-Efficacy
- 1-8 Augmented Outcomes
- 1-9 Autonomy Scale
- 1-10 Health-Focused PT Graph
- 1-11 First Do No Harm
- 1-12 Help or at Least Relevance to PT
- 1-13 Clinical Reasoning in PT
- 1-14 NCDs and MSK Dysfunction
- 1-15 Smoking Cessation
- 1-16 WCPT and the Health Improvement Card
- 1-17 Health Lifestyle Behaviors
- 1-18 Lancet-EAT Commission

## **5 Measurement, Documentation, and Clinical Decision Making**

---

- 5-1 Introduction

## **7 Pulmonary Function Tests**

---

- 7-1 Introduction
- 7-2 Spirometry Basics

## **8 Arterial Blood Gases**

---

- 8-1 Introduction

## **10 Electrocardiogram Identification and Interpretation**

---

- 10-1 Introduction
- 10-2 Video Case Study 1
- 10-3 Video Case Study 2

## **11 Multisystem Assessment and Laboratory Investigations**

---

- 11-1 Introduction

## **13 Clinical Assessment and Evaluation of the Cardiovascular and Pulmonary Systems**

---

- 13-1 Introduction
- 13-2 Patient Interviews

## **15 Maximizing Outcomes: Relating Interventions to an Individual's Needs**

---

- 15-1 Introduction

## **24 Integrative Therapies as Cardiovascular and Pulmonary Physical Therapy Interventions**

---

- 24-1 Introduction
- 24-2 OCMFR
- 24-3 Yoga 1
- 24-4 Yoga 2
- 24-5 Yoga 3
- 24-6 Yoga 4
- 24-7 Pilates 1
- 24-8 Introduction to Music Therapy
- 24-9 Music Therapy

## **25 Patient Education**

---

- 25-1 Introduction

## **27 Individuals with Chronic Primary Cardiovascular and Pulmonary Dysfunction**

---

- 27-1 Introduction

## **28 Individuals with Chronic Secondary Cardiovascular and Pulmonary Dysfunction**

---

28-1 Introduction

## **29 Monitoring Systems, Catheters, and Devices in the Intensive Care Unit**

---

29-1 Introduction

## **34 Multisystem Consequences of Impaired Breathing Mechanics and/or Postural Control**

---

34-1 Breathing Pattern 1

34-2 Breathing Pattern 2

34-3 Breathing Pattern 3

34-4 Breathing Pattern 4

34-5 Breathing Pattern 5

34-6 Breathing Pattern 6

## **35 The Transplant Patient**

---

35-1 Ambulatory ECMO

## **39 Care of the Patient with an Artificial Airway**

---
