

# CONTENTS IN BRIEF

---

Chapter 1	<b>General Principles of Musculoskeletal Imaging</b>	<b>1</b>
Chapter 2	<b>Radiologic Evaluation, Search Patterns, and Diagnosis</b>	<b>39</b>
Chapter 3	<b>Radiologic Evaluation of Fracture</b>	<b>77</b>
Chapter 4	<b>Computed Tomography</b> <i>Hilmir Agustsson, PhD, MHSc, DPT</i>	<b>113</b>
Chapter 5	<b>Magnetic Resonance Imaging</b> <i>Hilmir Agustsson, PhD, MHSc, DPT</i>	<b>129</b>
Chapter 6	<b>Ultrasound Imaging</b> <i>Hilmir Agustsson, PhD, MHSc, DPT</i>	<b>145</b>
Chapter 7	<b>Radiologic Evaluation of the Cervical Spine</b> <i>Sherman Auyeung, PT, DPT, OCS, FAAOMPT</i> <i>Toran D. MacLeod, PT, PhD</i> <i>Rolando T. Lazaro, PT, PhD, DPT</i>	<b>159</b>
Chapter 8	<b>Radiologic Evaluation of the Temporomandibular Joint</b> <i>Hilmir Agustsson, PhD, MHSc, DPT</i>	<b>213</b>
Chapter 9	<b>Radiologic Evaluation of the Thoracic Spine, Sternum, and Ribs</b> <i>Toran D. MacLeod, PT, PhD</i> <i>Sherman Auyeung, PT, DPT, OCS, FAAOMPT</i> <i>Rolando T. Lazaro, PT, PhD, DPT</i>	<b>235</b>
Chapter 10	<b>The Chest Radiograph and Cardiopulmonary Imaging</b>	<b>281</b>
Chapter 11	<b>Radiologic Evaluation of the Lumbosacral Spine and Sacroiliac Joints</b> <i>Lance M. Mabry, PT, DPT, OCS, FAAOMPT</i>	<b>309</b>
Chapter 12	<b>Radiologic Evaluation of the Pelvis and Hip</b> <i>Michael D. Rosenthal, PT, DSc, SCS, ECS, ATC</i>	<b>361</b>
Chapter 13	<b>Radiologic Evaluation of the Knee</b> <i>Michael D. Rosenthal, PT, DSc, SCS, ECS, ATC</i>	<b>407</b>
Chapter 14	<b>Radiologic Evaluation of the Ankle and Foot</b> <i>Michael D. Rosenthal, PT, DSc, SCS, ECS, ATC</i>	<b>457</b>
Chapter 15	<b>Radiologic Evaluation of the Shoulder</b> <i>Kimiko Yamada, PT, DPT, OCS, ATC</i>	<b>513</b>
Chapter 16	<b>Radiologic Evaluation of the Elbow</b> <i>Kimiko Yamada, PT, DPT, OCS, ATC</i>	<b>561</b>
Chapter 17	<b>Radiologic Evaluation of the Hand and Wrist</b>	<b>601</b>
Chapter 18	<b>Integration of Diagnostic Imaging Into Physical Therapy Practice</b> <i>Richard Cahanin IV, PT, PhD, Cert DN</i> <i>Troy Burley, PT, PhD</i>	<b>661</b>
	<b>Answers to Self-Test Questions</b>	<b>687</b>

# TABLE OF CONTENTS

Chapter 1	<b>General Principles of Musculoskeletal Imaging</b>	<b>1</b>		
	<b>Why Study Imaging?</b>	<b>1</b>		
	<b>What Is Radiology?</b>	<b>2</b>		
	<b>What Is Musculoskeletal Imaging?</b>	<b>2</b>		
	<b>Historical Perspective</b>	<b>2</b>		
	Turn-of-the-Century Sensationalism	2		
	The 1910s and 1920s	3		
	The 1930s and 1940s	3		
	The 1950s and 1960s	3		
	The 1970s and 1980s	4		
	The 1990s and into the 21st Century	4		
	<b>Essential Science</b>	<b>4</b>		
	What Is a Radiograph?	4		
	What Is Radiation?	5		
	What Are X-rays?	6		
	<b>Image Receptors: Different Ways to Capture the X-Rays</b>	<b>7</b>		
	The Gold Standard: Film/Screen Radiography	7		
	Fluoroscopy	8		
	Computed Radiography	9		
	Digital Radiography	9		
	<b>Understanding the Image</b>	<b>10</b>		
	What Is Radiodensity?	10		
	Radiodensity as a Function of Composition: Anatomy in Four Shades of Gray	11		
	Radiodensity as a Function of Thickness	12		
	How Many Dimensions Can You See?	13		
	Radiodensity in a Rose	15		
	<b>More to the Radiograph</b>	<b>15</b>		
	Radiographic Terminology	15		
	Anteroposterior, Lateral, and Oblique Projections	16		
	Viewing Radiographs	16		
	Identification Markers	19		
	Image Quality Factors	19		
	<b>The Routine Radiographic Examination</b>	<b>24</b>		
	<b>The Radiologist as the Imaging Specialist</b>	<b>25</b>		
	<b>Other Common Studies in Musculoskeletal Imaging</b>	<b>25</b>		
	Contrast-Enhanced Radiographs	26		
	Conventional Tomography	26		
	Computed Tomography	27		
	Nuclear Imaging	29		
	Magnetic Resonance Imaging	31		
	Ultrasonography	31		
	<b>Interventional Techniques</b>	<b>31</b>		
	Epidural Steroid Injections	33		
	Spinal Nerve Blocks	33		
	Radiofrequency Ablation	33		
	Diskography	33		
	Percutaneous Needle Biopsy of the Spine	34		
	Percutaneous Vertebroplasty, Kyphoplasty, and Cementoplasty	34		
	Automated Percutaneous Lumbar Discectomy	34		
	Intradiscal Electrothermal Therapy	34		
	<b>The Imaging Chain</b>	<b>34</b>		
	<b>Summary of Key Points</b>	<b>35</b>		
	<b>Self-Test</b>	<b>37</b>		
Chapter 2	<b>Radiologic Evaluation, Search Patterns, and Diagnosis</b>	<b>39</b>		
	<b>Where Does Radiologic Image Interpretation Begin?</b>	<b>39</b>		
	What Are the Pitfalls of Image Interpretation?	39		
	What Can the Nonradiologist Offer to Image Interpretation?	39		
	<b>Search Pattern: The ABCS of Radiologic Analysis</b>	<b>40</b>		
	A: Alignment	41		
	B: Bone Density	43		
	C: Cartilage Spaces	44		
	S: Soft Tissues	46		
	<b>Radiologic Diagnosis of Skeletal Pathology</b>	<b>50</b>		
	Categories of Skeletal Pathology	50		
	Distribution of the Lesion	50		
	Predictor Variables	51		
	<b>Radiologic Characteristics of Common Pathologies</b>	<b>54</b>		
	Adult Rheumatoid Arthritis	55		
	Osteoarthritis (Degenerative Joint Disease)	58		
	Osteoporosis	61		
	Musculoskeletal Infections	65		
	Bone Tumors	67		

Chapter 3

<b>The Radiologic Report</b>	<b>71</b>
Heading	71
Clinical Information	72
Findings	72
Conclusions	73
Recommendations	73
Signature	73
<b>Radiologic Report Example</b>	<b>73</b>
<b>Summary of Key Points</b>	<b>73</b>
<b>Self-Test</b>	<b>75</b>
<b>Radiologic Evaluation of Fracture</b>	<b>77</b>
<b>Trauma, the Most Common Disorder</b>	<b>77</b>
Trauma Radiology	77
<b>What Is a Fracture?</b>	<b>78</b>
Biomechanics of Bone	78
Definition of Fracture	79
<b>Elements of Fracture Description</b>	<b>79</b>
Anatomic Site and Extent of the Fracture	80
Type of Fracture: Complete or Incomplete	80
Alignment of Fracture Fragments	81
Direction of Fracture Lines	82
Presence of Special Features	83
Associated Abnormalities	85
Fractures Caused by Abnormal Stresses or Pathological Processes	85
<b>Fractures in Children</b>	<b>87</b>
Location Description	87
Difficulties in Assessment of Immature Bone	88
Elements of Fracture Description	88
Healing Factors	90
<b>Reduction and Fixation of Fractures</b>	<b>91</b>
Reduction	91
Fixation	92
<b>Fracture Healing</b>	<b>93</b>
Cortical Bone Healing	93
Cancellous Bone Healing	93
Surgically Compressed Bone Healing	93
Radiologic Evaluation of Healing	94
<b>Time Frame for Fracture Healing</b>	<b>94</b>
Factors That Influence Rate of Fracture Healing	94
Radiologic Examination Intervals During Fracture Healing	95
<b>Complications in Fracture Healing</b>	<b>96</b>
Complications at Fracture Site	96
Late-Effect Complications of Fracture	96
Associated Complications in Other Tissues	97
Life-Threatening Complications	100

Chapter 4

<b>Commonly Missed Fractures</b>	<b>100</b>
Why Are Fractures Missed on Radiographs?	100
Which Fractures Are Missed?	101
<b>Summary of Key Points</b>	<b>103</b>
<b>Case Study</b>	<b>104</b>
<b>Self-Test</b>	<b>107</b>
<b>Appendix: Fracture Eponyms</b>	<b>108</b>
<b>Computed Tomography</b>	<b>113</b>

*Hilmir Agustsson, PhD, MHSc, DPT*

<b>Computed Tomography</b>	<b>113</b>
History	113
<b>Principles of CT</b>	<b>113</b>
Elements of a CT Scanner	114
Making the CT Image	114
<b>Different Forms of CT</b>	<b>114</b>
Three-Dimensional CT	115
CT Myelogram	115
Cone Beam CT	115
<b>Viewing CT Images</b>	<b>116</b>
Radiodensities	116
The Image	116
Viewing the Patient's Images	117
Selective Imaging—Windowing	117
Quality of the Image	118
<b>Clinical Uses of CT</b>	<b>119</b>
What Does CT Image Best?	119
What Are the Limitations of CT?	120
Summary and Future Developments	120
<b>Neuroimaging</b>	<b>120</b>
History	120
CT Versus MRI	120
CT and MRI Characteristics of the Brain	121
CT Exam: Six Brain Images	121
Common Cerebral Pathological Conditions	121
<b>Summary of Key Points</b>	<b>126</b>
<b>Self-Test</b>	<b>127</b>

Chapter 5

<b>Magnetic Resonance Imaging</b>	<b>129</b>
<i>Hilmir Agustsson, PhD, MHSc, DPT</i>	
<b>Magnetic Resonance Imaging</b>	<b>129</b>
History	129
Principles of MRI	129
Image Information and Protocols	131
Sequences	132
<b>Making the Magnetic Resonance Image</b>	<b>132</b>
The Elements of an MRI Scanner	132
Viewing Magnetic Resonance Images	134

Imaging Characteristics of Different Tissues	134
Image Quality	137
<b>Clinical Uses of MRI</b>	<b>137</b>
What Does MRI Image Best?	137
What Are the Limitations of MRI?	137
Use of Contrasts	138
Magnetic Resonance Arthrography	138
Magnetic Resonance Myelography	139
Comparison of MRI and CT	139
<b>Clinical Thinking Points</b>	<b>139</b>
Clinical Thinking Point 1: Bone Bruise—The Footprint of Injury	139
Clinical Thinking Point 2: Magnetic Resonance Imaging of Stress Fractures	140
<b>Summary and Future Developments</b>	<b>141</b>
<b>Summary of Key Points</b>	<b>142</b>
<b>Self-Test</b>	<b>143</b>
<b>Chapter 6 Ultrasound Imaging</b>	<b>145</b>
<i>Hilmer Agustsson, PhD, MHSc, DPT</i>	
<b>Ultrasound Imaging</b>	<b>145</b>
History	145
Ultrasound in Rehabilitation	145
Principles of Diagnostic Ultrasound	146
<b>Diagnostic Ultrasound Equipment</b>	<b>146</b>
The Pulser	146
The Ultrasound Transducer	146
The Scan Converter and Monitor	147
<b>Ultrasound Physics</b>	<b>147</b>
Production	147
Reception	147
The Ultrasound Beam	147
<b>Interaction Between Ultrasound and Tissues</b>	<b>147</b>
Absorption	147
Reflection	148
Refraction	148
Scattering	148
<b>Doppler Ultrasound</b>	<b>149</b>
Power Doppler	149
<b>The Ultrasound Image</b>	<b>149</b>
Applying the Transducer	149
Information Used to Create the Image	149
Viewing the Ultrasound Image	150
The Quality of the Image	154
Artifacts	154
<b>Clinical Uses of Ultrasound</b>	<b>155</b>
General Advantages	155
Imaging Characteristics—Comparison with MRI	155
What Are the Limitations of Ultrasound?	156
Future Developments	156

## Chapter 7

<b>Clinical Thinking Point—Musculoskeletal Ultrasound for the Nonradiologist</b>	<b>156</b>
<b>Summary of Key Points</b>	<b>157</b>
<b>Self-Test</b>	<b>158</b>
<b>Radiologic Evaluation of the Cervical Spine</b>	<b>159</b>
<i>Sherman Auyeung, PT, DPT, OCS, FAAOMPT</i>	
<i>Toran D. MacLeod, PT, PhD</i>	
<i>Rolando T. Lazaro, PT, PhD, DPT</i>	
<b>Review of Anatomy</b>	<b>160</b>
Osseous Anatomy	160
Ligamentous Anatomy	161
Joint Mobility	162
Growth and Development	163
Postural Development	163
<b>Routine Radiologic Evaluation</b>	<b>164</b>
Practice Parameters for Spine Radiography in Children and Adults	164
Basic Projections and Radiologic Observations	165
<b>Advanced Imaging Evaluation</b>	<b>178</b>
Introduction to Interpreting Sectional Anatomy of CT/MRI	178
Practice Parameters for Computed Tomography of the Spine	178
Basic CT Protocol	178
Practice Parameters for Magnetic Resonance Imaging of the Spine	182
Basic MRI Protocol	182
<b>Trauma at the Cervical Spine</b>	<b>186</b>
Diagnostic Imaging for Trauma of the Cervical Spine	186
Potential Injury to the Spinal Cord and Spinal Nerves	187
SCIWORA Syndrome	188
Fractures	188
Dislocations	192
Cervical Spine Sprains	196
Intervertebral Disk Herniations	196
<b>Degenerative Diseases of the Cervical Spine</b>	<b>198</b>
Degenerative Disk Disease	198
Degenerative Joint Disease	198
Foraminal Encroachment	198
Cervical Spine Spondylosis	199
Spondylosis Deformans	199
Diffuse Idiopathic Skeletal Hyperostosis	200
Clinical Considerations of the Degenerative Spine	200
<b>Cervical Spine Anomalies</b>	<b>201</b>
<b>Summary of Key Points</b>	<b>204</b>
<b>Case Studies</b>	<b>206</b>
<b>Self-Test</b>	<b>211</b>

Chapter 8	<b>Radiologic Evaluation of the Temporomandibular Joint</b>	<b>213</b>
	<i>Hilmer Agustsson, PhD, MHSc, DPT</i>	
	<b>Historical Perspective</b>	<b>213</b>
	Causes of Temporomandibular Joint Disorders	213
	<b>Review of Anatomy</b>	<b>214</b>
	Osseous Anatomy	214
	Articular Disk	214
	Ligamentous Anatomy	215
	Biomechanics of the Temporomandibular Joint	216
	Growth and Development	216
	<b>Imaging in the Evaluation of the Temporomandibular Joint</b>	<b>217</b>
	Conventional Radiographs	217
	Computed Tomography	220
	Magnetic Resonance Imaging	222
	Ultrasound	233
	<b>Pathological Conditions of the Temporomandibular Joint</b>	<b>224</b>
	Osteoarthritis	224
	Rheumatoid Arthritis	224
	<b>Disk Displacement</b>	<b>225</b>
	Etiology	225
	Clinical Presentation	226
	Classification	226
	Grading Displacements	226
	Radiologic Findings	226
	MRI of Disk Displacements	226
	Treatment of Disk Displacement	226
	<b>Other Disorders and Findings</b>	<b>227</b>
	Temporomandibular Joint Hypermobility	227
	Disk Adhesion	227
	Fractures	228
	Cranio-mandibular Anomalies	228
	<b>The Temporomandibular Joint and the Cervical Spine</b>	<b>228</b>
	Positional Faults of the Cervical Spine	228
	Positional Faults in the Coronal Plane	230
	<b>Acknowledgment</b>	<b>231</b>
	<b>Summary of Key Points</b>	<b>232</b>
	<b>Case Study</b>	<b>232</b>
	<b>Self-Test</b>	<b>234</b>

Chapter 9	<b>Radiologic Evaluation of the Thoracic Spine, Sternum, and Ribs</b>	<b>235</b>
	<i>Toran D. MacLeod, PT, PhD</i>	
	<i>Sherman Auyeung, PT, DPT, OCS, FAAOMPT</i>	
	<i>Rolando T. Lazaro, PT, PhD, DPT</i>	
	<b>Review of Anatomy</b>	<b>235</b>
	Osseous Anatomy	235
	Ligamentous Anatomy	237

	Joint Mobility	238
	Growth and Development	238
	Spinal Cord Anatomy	239
	<b>Routine Radiologic Evaluation</b>	<b>241</b>
	Practice Parameters for Spine Radiography in Children and Adults	241
	Standard Projections and Radiologic Observations	241
	<b>Advanced Imaging Evaluation</b>	<b>250</b>
	Introduction to Interpreting Sectional Anatomy of CT/MRI	250
	Practice Parameters for Computed Tomography of the Spine	250
	Basic CT Protocol	250
	Practice Parameters for Magnetic Resonance Imaging of the Spine	254
	Basic MRI Protocol	254
	<b>Trauma at the Thoracic Spine</b>	<b>258</b>
	Diagnostic Imaging for Trauma of the Thoracic Spine	258
	The Three-Column Concept of Spinal Stability	258
	One- or Two-Column Injuries	258
	Two- or Three-Column Injuries	261
	Fractures of the Bony Thorax	263
	<b>Abnormal Conditions (Non-traumatic)</b>	<b>264</b>
	Osteoporosis	264
	Scoliosis	265
	Tuberculous Osteomyelitis (Pott's Disease)	270
	Scheuermann's Disease	270
	<b>Vertebral, Rib, and Sternal Anomalies</b>	<b>272</b>
	<b>Summary of Key Points</b>	<b>274</b>
	<b>Case Studies</b>	<b>276</b>
	<b>Self-Test</b>	<b>280</b>

Chapter 10	<b>The Chest Radiograph and Cardiopulmonary Imaging</b>	<b>281</b>
	<b>Where Does Cardiopulmonary Imaging Begin?</b>	<b>281</b>
	<b>Radiographic Anatomy</b>	<b>281</b>
	Bony Thorax	281
	Respiratory Organs	282
	The Heart	283
	The Mediastinum	284
	The Hilum	285
	The Diaphragm	285
	<b>Routine Radiologic Evaluation</b>	<b>286</b>
	Practice Parameters for the Performance of Pediatric and Adult Chest Radiography	286
	Basic Projections and Radiologic Observations	286
	<b>Pathology</b>	<b>292</b>
	Imaging Choices in Cardiopulmonary Assessment	292
	Diagnostic Categories	292

The Lung Field Is Abnormally White	292
The Lung Field Is Abnormally Black	294
The Mediastinum Is Abnormally Wide	295
The Heart Is Abnormally Shaped	297

<b>Advanced Imaging</b>	<b>298</b>
Ultrasound of the Heart: Echocardiography	298
Ultrasound of the Thorax	299
Nuclear Medicine	299
Conventional Angiography	300
Computed Tomography Pulmonary Angiography	301
Magnetic Resonance Angiography	302
<b>Summary of Key Points</b>	<b>303</b>
<b>Case Study</b>	<b>304</b>
<b>Self-Test</b>	<b>308</b>

Chapter 11	<b>Radiologic Evaluation of the Lumbosacral Spine and Sacroiliac Joints</b>	<b>309</b>
------------	---	------------

*Lance M. Mabry, PT, DPT, OCS, FAAOMPT*

<b>Review of Anatomy</b>	<b>309</b>
Osseous Anatomy	309
Ligamentous Anatomy	311
Joint Mobility	312
Growth and Development	313

<b>Routine Radiologic Evaluation</b>	<b>314</b>
Practice Parameters for Lumbar Spine Radiography in Children and Adults	314
Standard Projections and Radiologic Observations	314

<b>Advanced Imaging Evaluation</b>	<b>328</b>
Introduction to Interpreting Sectional Anatomy	328
Practice Parameters for Computed Tomography of the Spine	328
Basic CT Protocol	328
Practice Parameters for Magnetic Resonance Imaging of the Spine	333
Basic MRI Protocol	333

<b>Trauma at the Lumbar Spine</b>	<b>336</b>
Diagnostic Imaging for Trauma of the Lumbar Spine	336
Fractures of the Lumbar Spine	336
Spondylolysis	336
Spondylolisthesis	338

<b>Degenerative Conditions at the Lumbar Spine</b>	<b>339</b>
Clinical Considerations of the Degenerative Spine	341
Lumbar Stenosis	341
Intervertebral Disk Herniations	344

<b>Sacroiliac Joint Pathology</b>	<b>348</b>
Ligamentous Injury	348
Degenerative Joint Disease	349
Sacroiliitis	349
Ankylosing Spondylitis	349

<b>Lumbosacral Anomalies</b>	<b>349</b>
Facet Tropism	350
Aberrant Transitional Vertebrae	350
Spina Bifida	350
<b>Summary of Key Points</b>	<b>352</b>
<b>Case Studies</b>	<b>354</b>
<b>Self-Test</b>	<b>359</b>

Chapter 12	<b>Radiologic Evaluation of the Pelvis and Hip</b>	<b>361</b>
------------	--	------------

*Michael D. Rosenthal, PT, DSc, SCS, ECS, ATC*

<b>Review of Anatomy</b>	<b>361</b>
Osseous Anatomy	361
Ligamentous Anatomy	362
Joint Mobility	363
Growth and Development	363

<b>Routine Radiologic Evaluation</b>	<b>364</b>
Practice Parameter for Extremity Radiography in Children and Adults	364
Standard Projections and Radiologic Observations	365
Additional Views Related to the Hip	372

<b>Advanced Imaging Evaluation</b>	<b>372</b>
Introduction to Interpreting Hip Sectional Anatomy	372
Practice Parameter for CT of the Hip	372
Basic CT Protocol	372
Practice Parameter for Magnetic Resonance Imaging of the Hip	376
Basic MRI Protocol	376

<b>Trauma at the Pelvis and Hip</b>	<b>380</b>
Diagnostic Imaging for Trauma of the Pelvis and Hip	380
Fractures of the Pelvis	380
Fractures of the Acetabulum	383
Fractures of the Proximal Femur	385
Hip Dislocation	386

<b>Pathological Conditions at the Hip</b>	<b>388</b>
Degenerative Joint Disease of the Hip	388
Rheumatoid Arthritis of the Hip	390
Avascular Necrosis of the Proximal Femur	391
Slipped Capital Femoral Epiphysis	394
Developmental Dysplasia of the Hip	394
Femoroacetabular Impingement With Labral Pathology	396

<b>Summary of Key Points</b>	<b>399</b>
<b>Case Studies</b>	<b>400</b>
<b>Self-Test</b>	<b>405</b>

Chapter 13	<b>Radiologic Evaluation of the Knee</b>	<b>407</b>
------------	--	------------

*Michael D. Rosenthal, PT, DSc, SCS, ECS, ATC*

<b>Review of Anatomy</b>	<b>407</b>
Osseous Anatomy	407
Ligamentous Anatomy	409

Joint Mobility	409
Growth and Development	411
<b>Routine Radiologic Evaluation</b>	<b>411</b>
Practice Parameter for Knee Radiography in Children and Adults	411
Standard Projections and Radiologic Observations	411
Additional Views Related to the Knee	422
<b>Advanced Imaging Evaluation</b>	<b>422</b>
Introduction to Interpreting Knee Sectional Anatomy	422
Practice Parameter for CT of the Knee	422
Basic CT Protocol	422
Practice Parameter for Magnetic Resonance Imaging of the Knee	426
Basic MRI Protocol	426
<b>Trauma at the Knee</b>	<b>430</b>
Diagnostic Imaging for Trauma of the Knee	430
Fractures	430
Patellofemoral Subluxations	434
Injury to the Articular Cartilage	436
Meniscal Tears	437
Injury to the Ligaments	438
<b>Degenerative Joint Disease</b>	<b>442</b>
Radiologic Evaluation	442
Location of Degenerative Joint Disease	443
Treatment	443
<b>Knee Anomalies</b>	<b>443</b>
Genu Valgum	443
Genu Varum	443
Genu Recurvatum	445
<b>Summary of Key Points</b>	<b>448</b>
<b>Case Studies</b>	<b>449</b>
<b>Self-Test</b>	<b>455</b>
<b>Chapter 14 Radiologic Evaluation of the Ankle and Foot</b>	<b>457</b>
<i>Michael D. Rosenthal, PT, DSc, SCS, ECS, ATC</i>	
<b>Review of Anatomy</b>	<b>457</b>
Osseous Anatomy	457
Ligamentous Anatomy	458
<b>Routine Radiologic Evaluation</b>	<b>460</b>
Practice Parameter for Ankle and Foot Radiography in Children and Adults	460
Standard Projections and Radiologic Observations	461
<b>Advanced Imaging Evaluation</b>	<b>476</b>
Introduction to Interpreting Ankle and Foot Sectional Anatomy	476
Practice Parameter for CT of the Ankle and Foot	476
Basic CT Protocol	476
Practice Parameter for Magnetic Resonance Imaging of the Ankle and Hindfoot	480
Basic MRI Protocol	480

<b>Trauma at the Ankle and Foot</b>	<b>486</b>
Diagnostic Imaging for Trauma of the Ankle and Foot	486
Sprains at the Ankle	486
Tendon Pathology	488
Fractures at the Ankle	490
Fractures of the Foot	492
<b>Deformities of the Foot</b>	<b>496</b>
Radiologic Evaluation	496
Hallux Valgus	497
Pes Cavus	497
Pes Planus	500
Talipes Equinovarus	502
<b>Foot Anomalies</b>	<b>502</b>
Accessory Bones	502
<b>Summary of Key Points</b>	<b>503</b>
<b>Case Studies</b>	<b>505</b>
<b>Self-Test</b>	<b>511</b>
<b>Chapter 15 Radiologic Evaluation of the Shoulder</b>	<b>513</b>
<i>Kimiko Yamada, PT, DPT, OCS, ATC</i>	
<b>Review of Anatomy</b>	<b>514</b>
Osseous Anatomy	514
Ligamentous Anatomy	514
Joint Mobility	515
Growth and Development	516
<b>Routine Radiologic Evaluation</b>	<b>516</b>
Practice Parameters for Radiography of the Shoulder in Children and Adults	516
Standard Projections and Radiologic Observations	516
<b>Advanced Imaging Evaluation</b>	<b>530</b>
Introduction to Interpreting Shoulder Sectional Anatomy	530
Practice Parameters for CT of the Shoulder	530
Basic CT Protocol	530
Practice Parameters for Magnetic Resonance Imaging of the Shoulder	534
Basic MRI Protocol	534
<b>Trauma at the Shoulder</b>	<b>538</b>
Diagnostic Imaging for Trauma of the Shoulder	538
Fractures of the Proximal Humerus	538
Fractures of the Clavicle	539
Fractures of the Scapula	541
Dislocations of the Glenohumeral Joint	542
Acromioclavicular Joint Separation	543
Rotator Cuff Tears	545
Glenoid Labrum Tears	547
<b>Abnormal Conditions</b>	<b>550</b>
Impingement Syndrome	550
Adhesive Capsulitis	551
<b>Summary of Key Points</b>	<b>552</b>
<b>Case Studies</b>	<b>553</b>
<b>Self-Test</b>	<b>559</b>

Chapter 16	<b>Radiologic Evaluation of the Elbow</b>	<b>561</b>	
	<i>Kimiko Yamada, PT, DPT, OCS, ATC</i>		
	<b>Review of Anatomy</b>	<b>561</b>	
	Osseous Anatomy	561	
	Ligamentous Anatomy	562	
	Joint Mobility	563	
	Growth and Development	563	
	<b>Routine Radiologic Evaluation</b>	<b>563</b>	
	Practice Parameters for Elbow Radiography in Children and Adults	563	
	Standard Projections and Radiologic Observations	565	
	<b>Advanced Imaging Evaluation</b>	<b>574</b>	
	Introduction to Interpreting Elbow Sectional Anatomy	574	
	Practice Parameters for CT of the Elbow	574	
	Basic CT Protocol	574	
	Practice Parameters for Magnetic Resonance Imaging of the Elbow	578	
	Basic MRI Protocol	578	
	<b>Trauma at the Elbow</b>	<b>582</b>	
	Diagnostic Imaging for Trauma of the Elbow	584	
	Fractures and Dislocations	584	
	Distal Biceps Tendon Tear	590	
	Triceps Tendon Tear	591
