Preface

Acknowledgments

## Section I Nature of Stuttering

### 1. **Introduction to Stuttering**

Perspective

Overview of the Disorder

Definitions

The Human Face of Stuttering

Basic Facts about Stuttering and Their Implications for the Nature of Stuttering

### 2. **Primary Etiological Factors in Stuttering**

What Do We Know About Constitutional Factors in Stuttering?

Hereditary Factors

Congenital and Early Childhood Trauma Studies

Brain Structure and Function

### 3. **Sensorimotor, Emotional, and Language Factors in Stuttering**

Sensorimotor Factors

Language Factors

Emotional Factors

### 4. **Developmental and Environmental Factors in Stuttering**

Developmental Factors

Environmental Factors

### 5. **Learning and Unlearning**

Learning

Unlearning

### 6. **Theories about Stuttering**

Theoretical Perspectives About Constitutional Factors in Stuttering

Theoretical Perspectives on Developmental and Environmental Factors

Integration of Perspectives on Stuttering

### 7. **Typical Disfluency and the Development of Stuttering**

Overview  
Typical Disfluency  
Younger Preschool Children: Borderline Stuttering  
Older Preschool Children: Beginning Stuttering  
School-Age Children: Intermediate Stuttering  
Older Teens and Adults: Advanced Stuttering

## Section II Assessment and Treatment of Stuttering

### 8. **Preliminaries to Assessment**

The Client's Needs  
Insurance Considerations  
The Client's Right to Privacy  
Multicultural and Multilingual Considerations  
The Clinician's Expertise  
Assessing Stuttering Behavior  
Assessing Speech Naturalness  
Assessing Speaking and Reading Rate  
FluencyBank  
Assessing Feelings and Attitudes  
Continuing Assessment

### 9. **Assessment and Diagnosis**

Preschool Child  
School-age Child  
Adolescent/Adult

### 10. **Preliminaries to Treatment**

Clinician's Attributes  
Clinician's Beliefs  
Treatment Goals  
Therapy Procedures

### 11. **Treatment of Younger Preschool Children: Borderline Stuttering**

An Integrated Approach  
Other Clinicians

### 12. **Treatment of Older Preschool Children: Beginning Stuttering**

An Integrated Approach  
Another Clinician's Approach: Sheryl Gottwald  
Treatment of Concomitant Speech and Language Problems

### 13. **Treatment of School-Age Children: Intermediate Stuttering**

An Integrated Approach  
Approaches of Other Clinicians

**14. Treatment of Adolescents and Adults: Advanced Stuttering**

An Integrated Approach

Other Approaches

**15. Related Disorders of Fluency**

Neurogenic Acquired Stuttering

Psychogenic Acquired Stuttering

Malingering

Cluttering
